

Changes Memo — Discussion Draft Revision

Package: GrnBit senior secured term loan (balloon structure)

Revision date: 2026-07-06

Prior version: Discussion draft published 2026-07-06

Stage advanced: Reviewed → **Revised** (Verified-ready posture)

Summary of updates

Area	Change
Baseline definition	Added one-sentence definition of <i>industry-typical baseline</i> and <i>Edge vs baseline</i> in cover letter, term sheet, loan agreement, and Simulation Assumptions Schedule.
Simulation transparency	New Simulation Assumptions Schedule with power cost, hashrate, efficiency, BTC, and scenario comparison; full model noted as available in data room.
Terminology	Standardized to OCTO-optimized digital-twin simulation ; consistent timestamp 2026-07-06T19:53:22.251Z throughout.
Negotiable items	All [●] placeholders marked <i>negotiable — to be agreed in definitive documentation</i> .
Risk disclosure	New Schedule D — Key Risks with ten facility-specific risks tied to covenants and events of default.
Substantiation	Cover letter substantiation rewritten with source table, logic chains, and twin traceability.
Number traceability	Every financial figure in tranche tables now includes a visible logic chain column.
Economics preserved	All original numbers, vendors, dates, dashboard link, and disclaimers unchanged.
Narrative consistency	Cross-document alignment on baseline, twin source, balloon rationale, and schedule references.
